DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 , drawn to an apparatus comprising a serial port and one serial interface engine (SIE) , classified in class 710, subclass 72.
 - II. Claims 11-17, drawn to a keyboard, classified in class 345, subclass 168.
 - III. Claims 18-25, drawn to a method of emulating a hub having multiple ports, classified in class 710, subclass 305.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In the instant case the combinations are based on vastly different functions ranging from an apparatus comprising a serial port and one serial interface engine (SIE); a keyboard and a method of emulating a hub having multiple ports.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2673

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II-III, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
